Summary

Full-stack developer working mainly with .NET and React, with hands-on experience taking features from code to production using Docker, Kubernetes and Azure DevOps.

Experience

Law Business Research — London, United Kingdom
Web Developer — *Apr 2025 – Present*
Junior Web Developer — *May 2024 – Apr 2025*

- Develop and maintain .NET APIs and server-rendered React applications.
- Build MCP servers that let AI assistants work with internal systems.
- Deploy services to Kubernetes with Helm charts and Azure DevOps pipelines.
- Trained a junior developer and helped plan and estimate team work.

Teaching Assistant (Computer Science) — Dhaka, Bangladesh
American International University-Bangladesh — *2020 – 2021*

- Developed lesson materials for CS courses, emphasising programming concepts and problem-solving.
- Provided focused tutoring to students, aiding in programming challenges and code debugging.

Education

Queen Mary University of London — London, United Kingdom
MSc, Artificial Intelligence — *2022 – 2023*

- **1st** class **Distinction**.

American International University-Bangladesh — Dhaka, Bangladesh
BSc, Computer Science and Engineering — *2017 – 2021*

- **GPA:** 3.93/4.00
- **Achievements:** Dean's List Award.

Technical Skills

Web Development: .NET Core, React, Next.js, C#, TypeScript, JavaScript
DevOps: Kubernetes, Helm, Azure DevOps, Docker, GitHub Actions, Git, Bash
Databases: PostgreSQL, Redis
Other: Swift, MCP, Rust, Linux, macOS
Languages: English (fluent), Bengali (native)

Projects

BugBlitz | *.NET Core, Next.js, PostgreSQL, Docker, Azure*

- Developed using .NET Core 8 and Next.js by adhering to SOLID guidelines.
- Decreased code complexity by 20% by delegating authentication to an OAuth2 microservice.
- Applied caching in Next.js, substantially cutting back on database queries and boosting efficiency.

Storetail | *.NET Core, React, Redux, PostgreSQL, JWT, Stripe*

- Leveraged Extension Pattern with SOLID principles for enhanced code organisation and readability.
- Formulated a CI/CD pipeline using GitHub Actions, enabling an efficient development-to-deployment transition.

ClipVee | *Swift, SwiftUI*

- A small clipboard history app for macOS, built on the open-source Maccy and installable with Homebrew.
